CONTENTS

RESEARCH. DESIGN CALCULATIONS. OPERATING EXPERIENCE

PROCESSES AND EQUIPMENT OF CHEMICAL, OIL AND GAS TECHNOLOGIES

Beloglazov V.P., Beloglazova L.V. Theoretical analysis of influence of design parameters of the splitter on the efficiency of inertial vacuum dust collector ................................................................. 3

CRYOGENIC TECHNOLOGY, PRODUCTION AND APPLICATION OF INDUSTRIAL GASES. REFRIGERATING

Yasha V.I., Vasileiev V.K., Chernov G.I., Panuyitch A.A. Influence of oil system on the capacity of screw refrigeration compressor with frequency regulation ....................................................... 6

COMPRESSORS. PUMPS. PIPELINE FITTINGS

Vanyashov A.D., Vasenko E.M. Estimation of energy efficiency of sites of the gas transmission system at replacement of flow parts of centrifugal compressors with decrease of calculated pressure ratio ......................................................................................................................... 14

Aistov I.P., Vansovich K.A. Assessment of growth of part-through cracks in the high pressure cylinder of long-stroke compressor ........................................................................................................ 23

FITTINGS COMPONENTS AND UNITS

Raikovskiy N.A., Yasha V.I., Abramov S.A., Zyulin D.V., Potapov V.V. Verification of numerical methods for research of the flow of the cooling medium in the sickle gap of oil-free bearing of turbine set ............................................................................................................................ 27

PRODUCTION TECHNOLOGY

Negrov D.A., Eremin E.N., Mozgovoy I.V. Development of polymer composite based on polytetrafluoroethylene and detonation-synthesized nanodiamonds ...................................................... 32

INDUSTRIAL ECOLOGY

Tarasceva K.R., Rasstegev A.N. Study of trends of medium temperature nonoxidizing pyrolysis of oily wastes .......................................................... 34

SAFETY. DIAGNOSTICS. REPAIR

Lagutin M.G., Abramov A.S., Mikhailovsky S.V., Sorokin V.G., Koryukin S.R. Statistics and analysis of typical damages of oil-fired boilers ......................................................................................................................... 38

Petrovskiy E.A., Bukhtiyarov V.V., Starostina E.O. Estimation of risks at functioning of elements of technological equipment .............................................................................................................. 42

INFORMATION

Zalyaev M.F., Yamaliyev V.U., Abudalipova E.M., Arvenyuk A.N. About the necessity of calculation of vibration during designing of elements of drill stem ........................................................................................................ 45
